Pairing Sequence

Wednesday, September 23, 2015   12:43 PM

Pairing sequence and ready to receive data
- Suit broadcasts BLE
- Device scans suits available
- If suits availabe
    - Create a bodyframe
    - Create FrameReader
- For each suit available create a Body
- For each Body
    - Create body segments
    - For each segment
        - Create Body SubSegment
        - For each SubSegment
            - Create Related Sensors
- Device starts listening to frames/body
- Device sends "start tracking" cmd to suit/body
- Brain prepares to send frames
